EDUCATION

B.E. — AI & Machine Learning
Sri Sairam Institute of Technology
Chennai, Tamil Nadu
Aug 2024 – May 2028

TECHNICAL SKILLS

Programming
Python, SQL
Machine Learning
Scikit-Learn, TensorFlow, Linear Regression, Random Forest, Feature Engineering, RMSE, R^2
Data Viz
Pandas, NumPy, Matplotlib, Seaborn
Web Dev
HTML, CSS, Flask, Django
Tools
Git, GitHub, Jupyter Notebook

STRENGTHS

- > Critical thinking & problem solver
- > Clear technical communication
- > Rapid tool adoption & self-learning

SUMMARY

Artificial Intelligence and Machine Learning undergraduate with hands-on experience building end-to-end ML pipelines using Python, scikit-learn, and Pandas. Developed predictive models with Linear Regression and Random Forest. Currently conceptualizing Zyra, an AI-powered healthcare startup. Actively seeking internship opportunities in AI, ML, or data-related roles.

PROJECTS

- Zyra – AI-Powered Healthcare Startup** 2025 – Present
- ▶ Conceptualizing an AI-driven platform for accessible health guidance and symptom-checking through a simple, intuitive interface.
 - ▶ Exploring ML model integration for health recommendations, bridging the gap between technology and primary healthcare for underserved communities.

- House Price Prediction Using ML** Sep – Oct 2025
- ▶ Designed and trained a supervised ML pipeline to predict residential house prices using area, room count, and location features.
 - ▶ Applied Linear Regression and Random Forest Regressor with preprocessing, feature encoding, and hyperparameter tuning.
 - ▶ Evaluated using RMSE and R^2 ; visualized insights with Matplotlib and Seaborn.

KEY ACHIEVEMENTS

- ▶ **Paper Presentation (International Level):** Participated as part of a team at Sri Sairam Institute of Technology, presenting original technical research at an international academic event.
- ▶ Delivered a complete end-to-end ML project — raw data to model evaluation — within two months as a first-year undergraduate.
- ▶ Improved model accuracy through systematic algorithm selection and hyperparameter tuning, demonstrating deep ML lifecycle understanding.
